

The *agent-native* operating system for UGC creator management.

Built for agents. **Not bolted on.**

Every UGC management tool is a nightmare for *both* parties.

Managers spend half their week on busywork. Creators get left without support between calls. Both sides churn.

THE MANAGER'S WEEK

Eight tabs open: Google Sheets, Gmail, Slack, Instagram + TikTok DMs, Notion, Calendly, PayPal, DocuSign

Chasing creators for content; chasing brands for approvals

Manually reconciling payouts

Remembering whose dog is named Bagel

Drafting 150+ outreach DMs every Monday

Hours searching for new creators

THE CREATOR'S EXPERIENCE

A check-in call every four weeks, if they're lucky

A brief, then weeks of silence

Vague feedback, weeks late

No clear sense of what "good" looks like

Waiting on payment with zero visibility

Incumbents (Grin, CreatorIQ, Whalar) are databases with a chatbot bolted on. The human still does all the work.

Three curves crossed *at once*.

01 · CAPABILITY

Agents got good

Tool use, memory, multi-step autonomy, all production-grade in 2026. The labour can finally be automated, not just summarised.

02 · DEMAND

UGC went mainstream

200M+ creators. A ~\$33B market growing ~25% a year. Every brand now runs UGC, and someone must operate it.

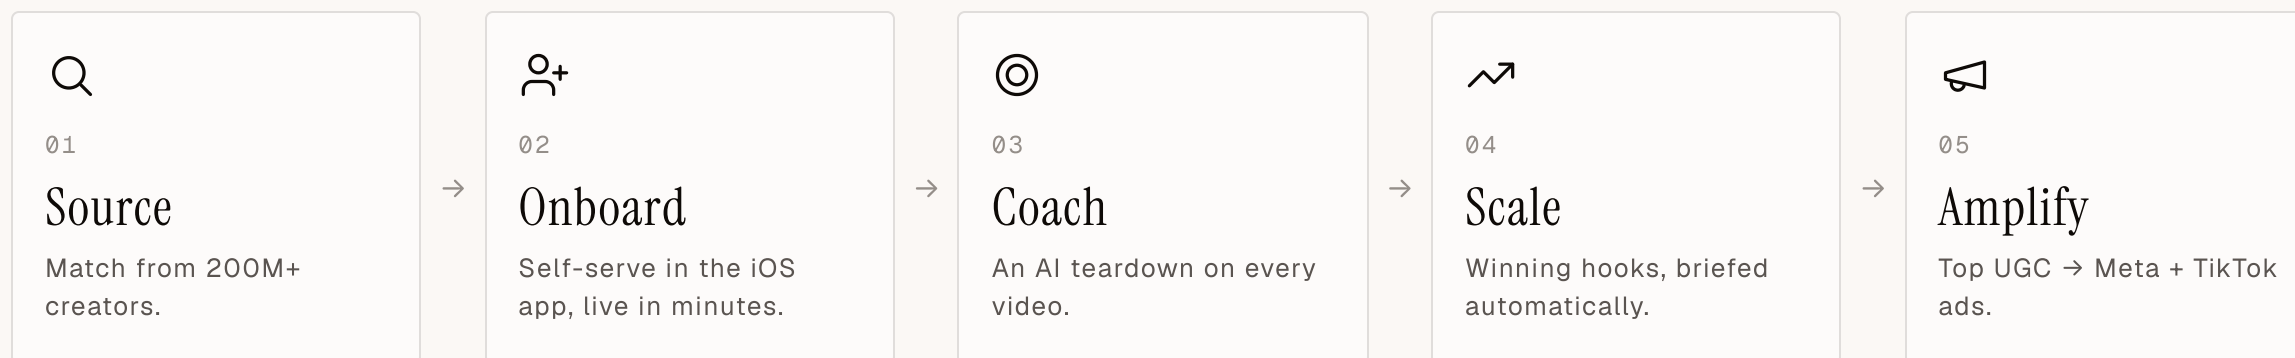

03 · INCUMBENCY

The tools predate AI

Grin, CreatorIQ, Modash are pre-AI CRMs. You can't retrofit agent-native onto a form. The category is up for grabs.

One system runs the whole UGC lifecycle, end to end.

Agent-run, human-approved, and the loop funds the next cohort.

Monday, 9am. The fleet has already done the week's busywork.

Maya · meeting in 47m. **Brief** ready. Trending **+22%**, 1.4M views. Mentioned her sister's wedding is June 12. 4d overdue · brand-fit doc

Tom · 12 days dark. **Outreach** drafted a check-in DM in Telegram: *"Saw the kitchen reset hit 300k, congrats. Quick one: how's the move to Lisbon going?"*

Trend-watch spotted a trend: 3 of your top-10 over-index on the "kitchen reset" hook. Audio variant up **340%** on TikTok this week. Two competitors started running it Friday.

Overnight · Outreach sent 15 chases, 9 replies queued. 3 approvals waiting

Roster strategy · 6-hour review: 4 promotions, 2 demotions, 1 cut-candidate. Weekly ROI report shipped to your inbox. One click each to confirm.

The manager has 4 decisions to make today. The fleet handled the other 47.

Manager web, shipped. Creator iOS, *next*.

Every CRM-first incumbent treats the creator as a row. We treat them as a person: 24/7 coaching and full visibility into their own data.

● SHIPPED · LIVE IN PRODUCTION

Manager web

sortcreators.com

Daily briefing: what needs you today

Relationship Health 0–100 per creator

Action items from every call transcript

Agent chat + MCP for any external agent

Usage rights, brand-safety, transparent payouts

○ IN BUILD · SHIPPING Q3 2026

Creator iOS app

8-screen onboarding · Sign in with Apple

24/7 AI coach, always on call

Per-video teardown + next iteration

Live brief + payout status

Content suggestions that convert

Direct line to manager + agents

Treat creators as people, not rows. Two-sided platform → two-sided retention.

Built and shipped solo, in 10 weeks.

CREATOR APP · TESTFLIGHT

~\$70_{/mo}

INFRA COST PER ORG

Pre-revenue, public launch imminent, but the product is real, deep, and shipping. Velocity is the proof.

You can't retrofit agent-native.

Incumbents bolt a chatbot onto a database built for humans. We built the data model for agents from line one: the foundation, not a feature you add later.

BOLT-ON CHATBOT

Form-shaped database, built for humans to type into

Memory dies at refresh

Saves five minutes. The busywork stays

AGENT-NATIVE

Schema built for agent reads: typed, provenance on every fact

Persistent memory, approval-gated writes, full audit

The whole operation runs itself

The wedge is architectural. You can't copy it with a sidebar.

The only agent-native operator in the category.

CAPABILITY	SORTCREATORS	GRIN / CREATORIQ	MODASH	VIRAL . APP	TAGGER
Agent-native data model	✓	—	—	—	—
24/7 autonomous agent fleet	✓	chatbot	—	—	—
Per-video AI hook analysis	✓	—	—	—	tags
Semantic search over transcripts	✓	—	—	—	—
Grounded operator chat (cited)	✓	—	—	—	—
Transparent payout rules	✓	partial	✓	✓	—
Multi-tenant RBAC at SMB price	✓	—	—	partial	—
Creator-side app	🕒 Q3	—	—	—	—

Incumbents can bolt on a chatbot. They can't re-pour the foundation.

SaaS margins, because the agents are the operator.

PRO

\$99 / mo

Solo managers & small agencies · 5–50 creators

Full agent fleet

Daily briefings + chat

Transparent payouts

STUDIO

\$399 / mo

Growing agencies · 50–250 creators

Everything in Pro

Multi-seat RBAC

Higher rate limits + API

ENTERPRISE

Custom

Brand teams & networks · 250+ creators

White-label + SSO

Custom integrations

A2A marketplace

Land and expand. Start on Pro, grow into Studio as rosters scale. The creator app drives word-of-mouth between managers, a built-in acquisition loop.

Structurally cheaper to run. ~\$70/mo infra per org. The fleet lets us serve the SMB + mid-market that \$2,500/mo incumbents can't reach, at software margins.

A \$33B market growing 25% a year, run by software that predates agents.

SOM

~\$300M

BEACHHEAD · IN-HOUSE
UGC TEAMS~85k orgs at our price point.
Bottoms-up, winnable first.

200M+ creators worldwide, 45M+ professional. Every brand now runs UGC, and someone has to operate it.

Incumbents priced for the era when the *manager* operated the tool. We priced for when the *agents* do.

Sources: Influencer Marketing Hub / Statista (influencer-marketing spend, ~\$32.5B 2025 → ~25% CAGR); Fortune Business Insights, Grand View Research (platform-software market). SOM is bottoms-up.

He's run the agency *and* been the creator.

Jacob Sprake

FOUNDER · SPR LABS LTD

Ran a marketing & UGC agency since **15**. Three years a **UGC creator**. He's lived both pains (the buried manager, the ignored creator) and built the fix solo, end to end.

EDUCATED AT

UGC AGENCY SINCE 15

UGC CREATOR · 3 YRS

SPR LABS · 28+ APPS

THE AGENCY SIDE

Ran the roster: the spreadsheets, the chasing, the payout reconciliation. The busywork SortCreators removes.

THE CREATOR SIDE

Made the content: the silence between calls, the vague feedback, the waiting on payment. The gaps the app closes.

Raising a *pre-seed* to turn a shipped product into a category.

pre-seed · SAFE · [valuation cap]

40%

Go-to-market

Marketing site, onboarding, and the motion to land the first 100 paying orgs.

35%

Creator-side build-out

Ship the iOS app, real money movement (payouts, contracts), and the marketplace.

25%

First hires + agent infra

One GTM hire, one engineer, and scaling the agent fleet to enterprise rosters.

What 18 months buys: the first 100+ paying orgs, the creator app and real payouts shipped, and the ARR run-rate that earns a Series A.

| *The system of record for every in-house UGC team: agents operating, humans deciding.*
